## 1 OBJECT CONSTRAINT LANGUAGE(OCL)

### 1.1 UserInterestList Constraint:

- **Description:** It has to be a registered user and for all the tags which a user interests, they have to relate to at least one article.
- **context** *User*  
**inv:**  $\text{interestList} \rightarrow \text{forAll}(e | e.\text{belong} \rightarrow \text{size}() > 0)$

### 1.2 DeleteComment Constraint:

- **Constraint:** Only a logged in user can delete a comment and that comment has to exist and created by the user.
- **Description:** If user wants to delete a comment, user can click on the delete button in the comment section and the comment will be deleted.
- **context** *User* :: *deleteComment(commentID : Long)*  
**pre:**  $\text{self.loginState} = \# \text{Logged}$  and  $\text{self.comment}() \rightarrow \text{exists}(\text{commentID} = e.id)$

### 1.3 LikeCount Constraint:

- **Constraint:** Only a logged in user can like an article.
- **Description:** If user wants to like an article, user clicks on the like button and the like count number of that article will be increased by 1.
- **context** *User* :: *addToLikes(articleID : Long, userID : Long)*  
**pre:**  $\text{self.loginState} = \# \text{Logged}$   
**let**  $\text{article} = \text{findByID}(\text{articleID})$   
**post:**  $\text{article.likeCount} = \text{article.likeCount} @ \text{pre} + 1$  and  $\text{likes} \rightarrow \text{append}(\text{article})$
